

# PRESS RELEASE: iHealth Innovative Solutions, LLC Announces MBE Certification

FOR IMMEDIATE RELEASE

January 24, 2018

Washington, D.C. – iHealth Innovative Solutions, LLC (iHealth) is proud to announce their recent Minority Business Enterprise (MBE), Disadvantage Business Enterprise (DBE), and Small Business Enterprise (SBE) Certification awarded by the Washington Metropolitan Area Transit Authority (WMATA) and the District of Columbia Department of Transportation (DDOT). This certification award demonstrates that iHealth meets the requirements to do business with large corporations, local, state, and federal government departments as a minority business entity.

On the iHealth certification award, Deon Norals, iHealth president and CEO noted, “Our certification provides an opportunity to bring our value, innovative ideas, and subject matter experts to the public sector. It also provides a collaborative advantage in leveraging our technologies and capabilities to build greater value for customers. By building strategic partnerships with prime contractors, we can not only help them meet their minority business participation, but also create significant value with our thought leadership. These alliances will create open-ended possibilities.”

According to WMATA, MBE/DBE/SBE-certified companies are eligible to fulfill minority business participation goals on contracts issued by the District of Columbia and will be listed in the directory of certified MBE/DBE/SBE firms.

Founded in 2013, iHealth Innovative Solutions (iHealth), is a leading professional services health information technology organization committed to assisting clients in delivering innovative and visionary technology solutions to help transform patient care, health information technology and health intelligence. At iHealth, our partnerships are integral to powering modern health care. As a health information technology company, we specialize in data analytics, cyber security, cloud management and transformation, electronic health records management, and program and project management. We partner with doctors, hospitals, pharmacies, health plans, employers, governments, and the people they serve. With system-wide scale, our solutions are built to meet our clients' changing needs while working to modernize the health care system. Together, we are transforming health care for a better future for everyone we serve. Our partners choose us for our combination of unique capabilities.
