

PRESS RELEASE: iHealth Innovative Solutions, LLC (iHealth) Awarded SBA HUBZone Certification FOR IMMEDIATE RELEASE

Date: May 5, 2020

Today, iHealth Innovative Solutions, (iHealth), announced it has been awarded the Historically Underutilized Business Zone (HUBZone) certification by the U.S. Small Business Administration (SBA). The program, passed into law as part of the Small Business Reauthorization Act of 1997, was established to provide qualified small businesses in historically underutilized business zones with assistance when pursuing Federal contracts.

“With this certification, we can bring our thought leadership in health information technology, cloud expertise, and cyber security transformation services to government customers in a more direct and strategic way that meets customer needs. This will also allow iHealth to contribute to the economic development of disadvantaged areas,” noted Deon Norals, iHealth Innovative Solutions Chief Executive Officer.

The HUBZone program helps small businesses in urban and rural communities gain preferential access to Federal procurement opportunities. As a HUBZone certified company with a Small Disadvantaged Business designation, iHealth now has access to Federal set-aside and sole source contracts, which in turn advances the Federal Government’s effort to spur economic growth in certain areas. These preferences go to small businesses that obtain HUBZone certification in part by employing staff who live in a HUBZone.

iHealth’s clients includes The Department of Health and Human Services (HHS), National Institute of Health, US Court of Appeals for Veterans Claims, and Millennium Challenge Corporation to name a few.

About iHealth Innovative Solutions, LLC.

Founded in 2013, iHealth Innovative Solutions (iHealth), is a small SBA certified health information technology organization located in the heart of Washington, DC. Our focus is on bringing the gap between healthcare and technology. We do this by leveraging best of breed solutions to address complex problems, that can not only deliver remarkable cost saving outcomes, but also accelerate discoveries using health intelligence and analytics. Our niche capabilities also include cloud transformation and implementation; electronic health records management and support; program and project management; application development; and protecting environment with state-of-the-art cyber security detection solutions.

We build value and opportunity by investing in cybersecurity, analytics, digital solutions, science, and consulting. Our culture of innovation empowers our employees as creative thinkers, bringing unparalleled value for our clients and for any problem we try to tackle to help them succeed in their mission.
